**DANBOR SERVICE AS**

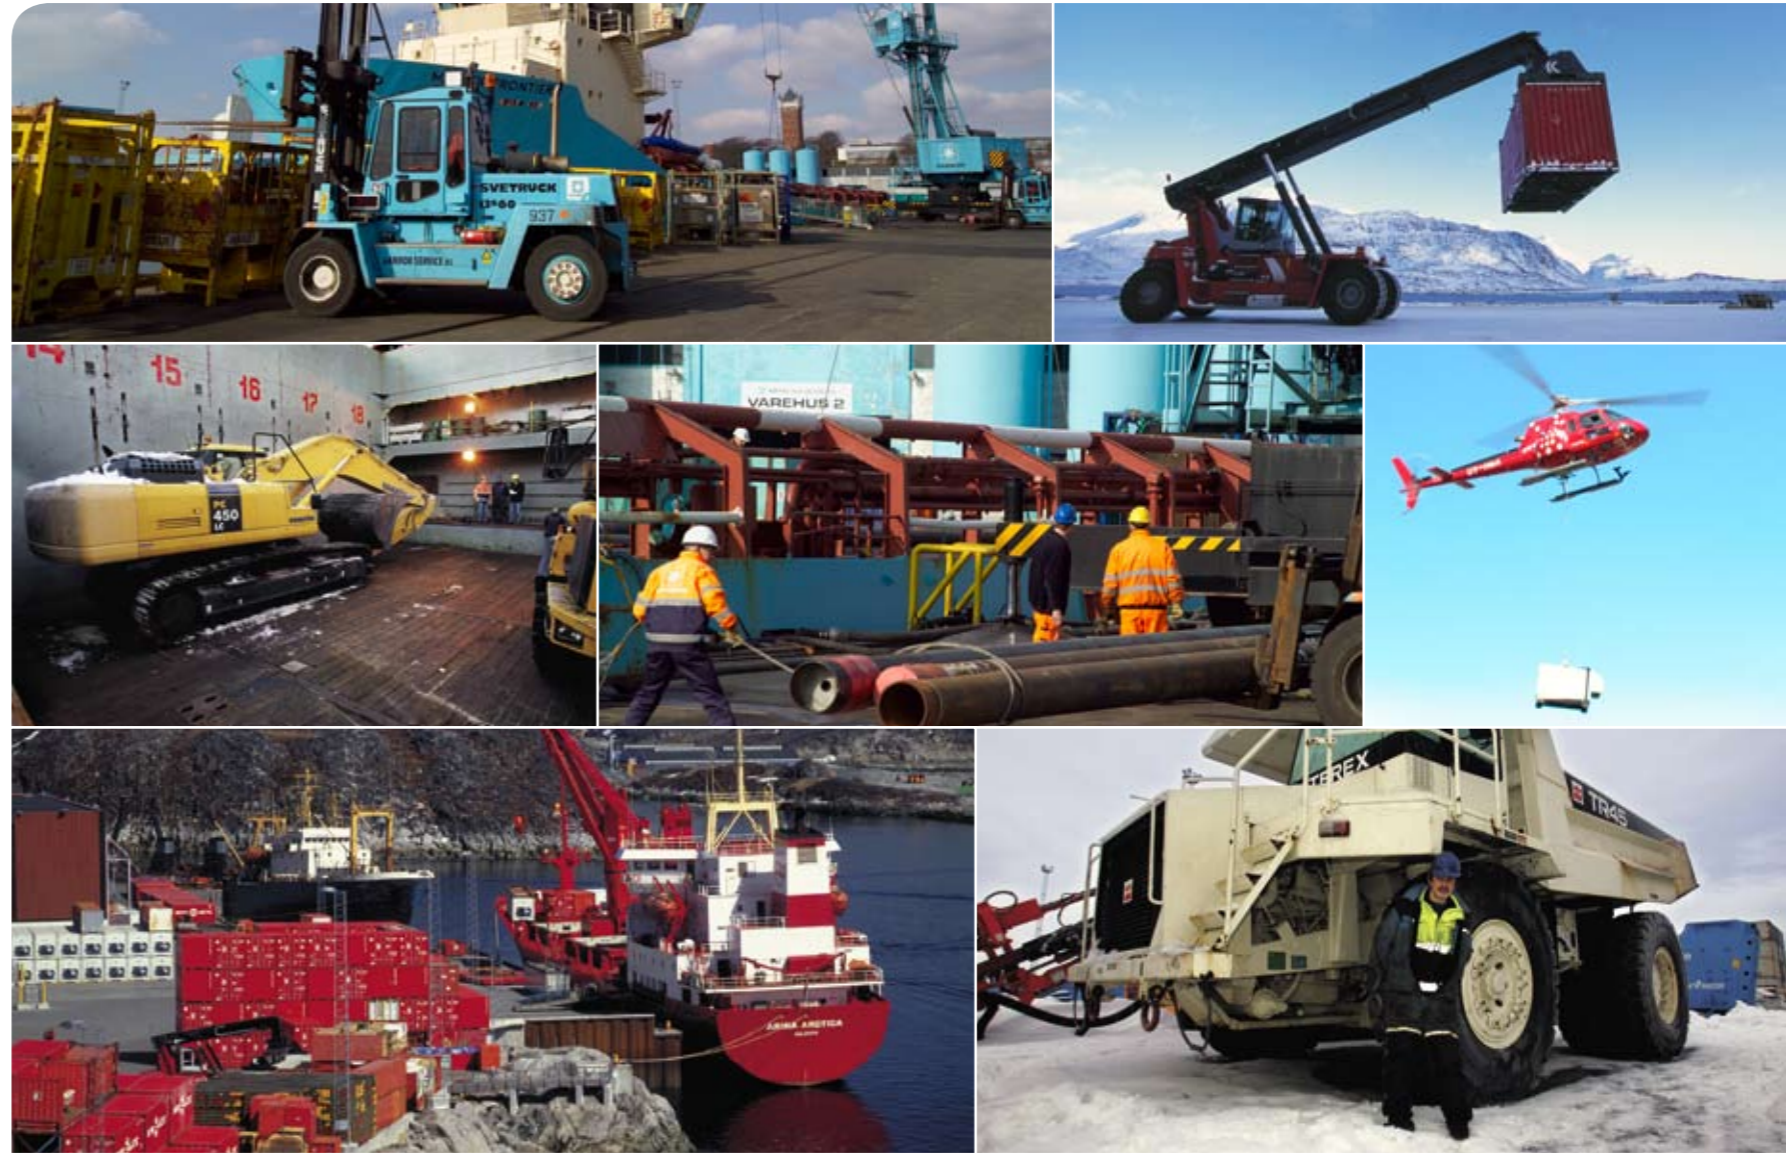

# Together – with the experience and resources to do the job

Exploring for oil, gas and minerals has gained serious momentum in Greenland. Expectations are high and the people, authorities and business community of Greenland actively support this development.

A powerful new alliance has taken shape: Danbor Service and Royal Arctic Line are joining forces to create a strong and reliable partner with the resources and experience necessary to support international operators in their exploration and development activities in Greenland with its often harsh Arctic conditions.

We offer a full range of services within logistics and support for minerals and oil companies throughout Greenland, on and offshore. We have the required strength combined with the best equipment and are available anywhere we are needed.

Royal Arctic Line and Danbor Service each have their own unique expertise in the provision of shore base facilities, stevedoring, and logistics and transportation for the oil and minerals industries. Joining forces allows us to deliver the complete solutions required for successful exploration and exploitation of oil and minerals in Greenland.

## ROYAL ARCTIC LINE A/S – Nuuk, Greenland

Royal Arctic Line, Greenland's national shipping line, has:

- ships and equipment specially designed for Arctic conditions
- its own facilities, locations and personnel in 13 Greenland harbours
- many years' experience navigating and operating in Arctic waters

The Royal Arctic Group offers a full range of transport and logistics solutions, from modern liner services between Greenland and the rest of the world, including special ships for Arctic operation, to air cargo and services within freight forwarding, liner agency and much more.

Royal Arctic Line has more than 600 experienced, skilled employees available with expertise and extensive local knowledge about Greenland.

## DANBOR SERVICE A/S – Esbjerg, Denmark

Danbor Service AS is Denmark's largest offshore base. Danbor handles a broad variety of activities in the offshore industry, including supply bases for the oil and gas industry, liner agency and logistics and support throughout the world. We also provide repair work, maintenance and certification of offshore installations, catering and industrial iron production. We also have expertise within H2S contingency and safety, fire and safety equipment, industrial metal production, pipe and container coating, as well as personnel for offshore and catering.

Danbor has more than 25 years of experience with customers from a variety of continents which is why we also have the professional equipment and qualified personnel to handle goods for the tough and unpredictable offshore conditions of Greenland. Danbor's [ANTAL] employees are expert at dealing with sensitive and difficult-to-handle goods, and we prioritise protecting the environment and safety exceptionally highly. Danbor's quality and safety systems are based on ISO 9001-2000.
